## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Drosdak '652.

The patent to Drosdak shows an apparatus for receiving and securing an end segment of a line 6 as shown in Fig. 2. Drosdak shows a connector having a receptacle 7 including a chamber 9 bound by a substantially continuous sidewall defining an inner diameter that is substantially equal to the outer diameter of on the end segment of line 6. Drosdak shows extensions 10 extending into the chamber and spaced at intervals along the entire length of the chamber. Drosdak shows coupler 1, 11-12 attached to the receptacle 7 for engaging and supporting a lure 5.

### ***Response to Arguments***

3. Applicant's arguments filed Sept. 19, 2001 have been fully considered but they are not persuasive. Applicant should note that the use of the open ended "comprising" does not preclude the application of Drosdak since more elements or structure can be present than recited in the claim. Applicant argues that sleeve 11 of Drosdak is not a coupler that is capable of engaging

and supporting a fishing lure. However, note that the coupler can be considered as the entire leader as stated above. In response to applicant's argument that structure does not always dictate function, function normally always dictates structure, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the specification) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Applicant should recite more structure such as plates 48-49 with prongs 51A and 51B.

### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 3643

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
